From there watch the rough seas of the Indian Ocean rush forward, hitting the rocks beneath the cliff; in the background witness the beautiful sunset colors, the orange sky as it slowly dims away, replaced by the moon at night.

We will also present a famous Balinese dance called Kecak. It is unusual because it has no musical accompaniment like many other Indonesian dances, the rhythm of the dance is produced by the chanting 'monkey' chorus. Instead, a troop of over 20 barechested men serve as the chorus, making a wondrous cacophony of synchronized "chak-achak-achak" clicking sounds while swaying their bodies and waving their hands. From that chanting noise of "Cak-cak-cak", then it gave the dance its name Kecak.
