- Be environmentally conscious in everything you do.

While onboard you may pick a buddy of your choice or dive with one of the yacht's staff members. There is ample storage space for your diving equipment in your personal locker. The Galapagos Aggressor III provides 80 cubic feet tanks, weight belts, and weights. All tanks have K-valves (American type), no DIN (European) valves. Nitrox is available for an additional fee, see our website for details.

We suggest you pack the following: mask, fins, snorkel, regulator with visible pressure gauge, depth gauge, dive computer, buoyancy compensator, light for night diving, batteries and dive gloves. Strongly recommended: Spare mask, safety sausage, whistle, Dive Alert, mirror and/or other safety devices. Dive computers are mandatory for each guest. Each piece of gear should be marked with waterproof paint or tape. Please see our "Captain's Log" on our website for current diving conditions.

The waters of the Galapagos Islands are a unique mixture of warm and cold water, ranging between 65°F and 85°F, with thermoclines about 65°F. We recommend you bring a 5mm-7mm wet suit with hood and gloves or a dry suit with light underwear all year round. We recommend you take precautions against motion sickness if you feel you will need it. See the "Adventure Log" on the Galapagos page, www.aggressor.com, for current diving conditions. The diving in Galapagos is varied and can have some current and surge.

The primary attraction in Galapagos is the large pelagics such as schooling Hammerhead sharks, Galapagos sharks, Silky Sharks, Bullhead Sharks, Reef Sharks, Mola Molas and Whale sharks. Occasionally, there is sighting of Whales, Marlin, Dolphin and Orcas. You will see a rare combination of warm and cold-water creatures including Sea Lions, Mantas, Penguins, Flightless Cormorants, Sting Rays, Eagle Rays, Turtles, Moray Eels, Sea Horses, Marine iguanas and enormous schools of unusual fish. Many of the marine creatures are found nowhere else on earth!

The best diving around the Galapagos Islands is made possible through the use of dinghies (or inflatable's) manned by the staff. Few dives are directly from the main vessel itself. Dinghy diving is made easy for you! Once your dive is completed, you hand your weight belt to the dinghy driver, take off your BCD and climb in.

DIVING SUPERVISION

You've chosen a LiveAboard vacation for the diving freedom that it offers. While in the water, you and your buddy are in charge. Every dive starts with a dive briefing from our staff. However, as a certified diver, you and your buddy are responsible for planning and conducting your own dives within the limitations set forth by the briefing. The staff will be on the dive deck providing surface support for divers. We will also have staff in the water offering support, u/w photography/videography, and critter spotting. On some dive sites a staff member will offer to lead a group and assist them in locating specific points of interest. However, the yacht does not offer direct supervision of dives. If you start out with a group, as long as you and your buddy remain in contact with each other and are ok – you may follow your own dive plan. Divers who desire more personal attention and structured/supervised dives should consider taking one of our numerous specialty courses. An underlying skill featured in all of specialty training is planning, executing, and debriefing after your dive in order to build a more confident diver.

CONSERVATION LAWS

The Galapagos Islands are a National Park and a Marine Reserve. Conservation laws do not permit spear fishing, fish feeding or collecting.
